

Environmental Protection Agency Internet Information

EPA Region 2

While Freedom of Information Act (FOIA) requests will be honored by directly writing to Region 2, EPA provides an increasing amount of environmental media information, and other Regional activities via Internet at <http://www.epa.gov>.

Region 2 has provided a FOIA Web site <http://www.epa.gov/region02/foia/> with several online databases from which the environmental information can be retrieved.

- **"Frequently FOIAed Files"** Web site <http://www.epa.gov/region2/foia/fff.htm> covers RCRA and many other media Programs. Through this Web site, you can learn about each media Program, associated databases, and special points of interest. In particular, the ability to "directly download" all of the most commonly requested Region 2 Export Files (.xls) and Reports (.pdf) - all compressed for quicker downloading.

EPA Region 2 has established a **list of contaminated facilities** that are a high priority for cleanup in New York, New Jersey, Puerto Rico and the U.S. Virgin Islands. You can view each facility fact sheet at <http://www.epa.gov/region2/waste/cleanup/sites/>

EPA- Headquarters

- **Envirofacts Data Warehouse** Web site http://www.epa.gov/enviro/index_java.html is a one-stop source to the environmental information. This Web site provides access to several EPA databases with information about environmental activities that may affect air, water and land anywhere in the United States.
- **"Window to My Environment"** Web site <http://www.epa.gov/enviro/wme> is a powerful tool that provides a wide range of federal, state and local information about environmental conditions and futures in an area of your choice.
- **The Enforcement and Compliance History Online (ECHO)** Web site <http://www.epa.gov/echo/> provides a list of all inspections and enforcement under most of the environmental statutes.
- **Right-To-Know Network (RTK Net)**, a non-EPA Web site <http://www.rtk.net.org/> on-line query engine provides free access to numerous databases and resources on environment.
- **National Biennial RCRA Hazardous Waste Report** Web site <http://www.epa.gov/epaoswer/hazwaste/data/biennialreport/index.htm> provides documents and data on hazardous waste reports.
- **Conditionally Exempt Small Quantity Generators** Web site <http://www.epa.gov/osw/hazard/generation/cesgg.htm> provides information on Conditionally Exempt Small Quantity Generators.

DuPont Pompton Lakes - Request a Review of DOE Records Under FUSRAP for Depleted Uranium

Paul Giardina to: christopher.clayton, steven.miller

History: This message has been forwarded.

Good Morning Gentlemen:

This will follow-up a call I had earlier today with Steven Miller and my voice message to Christopher Clayton.

The EPA Region 2 Office is currently in the process of dealing with a RCRA Corrective Action matter involving a site in Pompton Lakes owned and operated by DuPont. Recently, citizen's have brought to our attention concerns that the site may have handled depleted Uranium during its history. DuPont has indicated to us that their records show they never handled depleted Uranium at this site. We are aware, however, that DuPont did have some working arrangement with the U.S. Government at their Deepwater Facility in Southern New Jersey and that this has resulted in the site being included in the Formerly Utilized Sites Remedial Action Program (FUSRAP). While we realize that these sites are different and geographically separated by quite a few miles we still would like you to conduct a search of your records to determine if the site in Pompton Lakes, NJ received or handled any depleted Uranium as part of the Manhattan Engineering District (MED) or early Atomic Energy Commission (AEC) efforts that might make this eligible for FUSRAP.

As such, can you please do the following:

1. Conduct a record search to determine if the DuPont site ever handled depleted Uranium as part of the AEC/MED work done by the Federal government.
2. Let me know how long such a search might take.

Please provide any responses to both me and to Adolph Everett our RCRA Programs Branch Chief whose email address is contained in the cc: box.

Thank you again for your continued efforts in working with us at EPA to assure the protection of public health and the environment.

Paul A. Giardina, Chief
Radiation & Indoor Air Branch

Subject: RE: Fw: FOIA Request concerning Pompton Lakes, NJ and the issue of uranium.

Dave,

You can provide the below information to the FOIA request

Review of Cladding Tunnel Inspection

- DOE Radiological Record Search: No Records Related to Depleted Uranium or Other Radiological Contaminants
- EPA Physical Inspection: All radiation readings at entrance of the tunnel and inside tunnel were within the natural background level ranging from 6-16 uR/h
